Email: kunaldhangar184@gmail.com

Mobile: +916266089196

SKILLS

Languages: JavaScript, TypeScript, SQL, HTML, CSS, Shell scripting
Databases: MySQL, PostgreSQL, MongoDB
Frameworks/Libraries: ReactJS, NextJS, Tailwind CSS, NodeJS, ExpressJS
Tools: Docker, Jenkins, Git, GitHub, Bash, Postman, VS code
Cloud Platforms: AWS (S3, EC2), Google Cloud
Soft Skills: Data-Driven Decision Making, Continuous Learning, Prioritization, Client Relations

EXPERIENCE

Orbosis Global Pvt. Ltd. Certificate

Nov' 25 – Jan' 26

Web Development Intern

- Spearheaded full-stack Progressive Web App (PWA) development using the MERN stack, achieving 100% code reusability across web and mobile platforms.
- Optimized backend performance via Redis caching strategies, shortening API latency by 30% and minimizing database load.
- Automated transaction handling by integrating Razorpay webhooks, which decreased manual verification time by 40%.

Tech: React.js, Node.js, Express.js, MongoDB, Redis.

PROJECTS

Creolink (Collaborative Video Project Management Platform) GitHub | Link

Jan' 26 – Mar' 26

- Built a real-time collaboration engine using **WebSockets** (Socket.io) + PostgreSQL, delivering 100ms state sync latency across distributed freelance teams and ensuring a consistent single source of truth.
- Implemented **timeline-aware metadata version control** allowing users to access sequence-level project information.
- Optimized metadata sync, reducing bandwidth consumption by 80% compared to full media sync approaches.
- Designed plugin architecture for **Adobe Premiere Pro** enabling timeline metadata extraction without transferring raw video assets.

Tech: Next.js, Node.js, PostgreSQL, Adobe Premiere Pro plugin(CEP/UXP).

KripaConnect (Full Stack Ecommerce Platform) GitHub | Link

Nov' 25

- Architected a secure authentication system using JWT + Refresh Tokens + Google OAuth 2.0, implementing **Role-Based Access Control (RBAC)** for admin/customer workflows, mitigating unauthorized endpoint access risk by 95%.
- Increased backend throughput by 40% via optimized MongoDB **indexing and Redis caching**, achieving 800ms average API response time under simulated peak traffic (1k+ concurrent requests).
- Integrated an ACID-compliant order & payment transaction pipeline integrating Razorpay, guaranteeing 100% payment verification consistency and stopping duplicate order creation during network retries.
- Developed secure middleware-based request validation and token rotation, lowering session hijacking and replay attack exposure

Tech: React.js, Node.js, Express.js, MongoDB, Redis, JWT.

TRAINING

SUMMER TRAINING | LPU | Link

Jun' 25 – Jul' 25

- Engineered a scalable backend in MongoDB, processing requests with 200ms latency during load testing.
- Implemented end-to-end MERN workflows, refining database schema design for scalability.

CERTIFICATES

Cloud Computing | NPTEL

Oct' 25

Bits & Bytes of Networking | Google

Sep' 24

Introduction to Hardware & OS | IBM

Sep' 24

ACHIEVEMENTS

Achieved CodeChef rating 1199+ by solving competitive problems on CodeChef

Feb' 26 – Present

Solved 450+ algorithmic problems across Leetcode, CodeForces, GeeksForGeeks

Jan' 26

EDUCATION

Lovely Professional University

Punjab, India

Bachelor of Technology - Computer Science and Engineering; **CGPA: 7.2**

Aug' 23 - Present

Govt. Boys High Secondary School

Sarangpur, MP, India

Intermediate; **Percentage: 62**

Jul' 21 – Mar' 22

Unique School Of Modern Education

Pachore, MP, India

Matriculate; **Percentage: 74**

Jun' 18 – Mar' 19
